# LACES

# FOR ALL

# FROM NON-WAXED TO HEAVY-WAXED

**BLUE SPORTS™ laces for all skates and sizes. Some players prefer waxed hockey laces because of their ability to grip tighter or stay looser without coming undone.**

**While waxed laces are better in certain circumstances, there are disadvantages, too. Unwaxed laces are easier to grasp and untie, which is especially helpful to young players.**

BUILT LIKE

A SHOE

# WALKABLE

In 2015, we decided to develop a skate guard that could be walked with. The goal was to create a product with shoe-like properties. The first technical drawing of the prototype was produced in March that year. Several prototypes were developed and tested until the launch in 2016.

Produced in a shoe manufacturing plant, the PREMIUM SKATE GUARD is based on our PLATINUM SOAKER, we've added a wide cut-resistant band to the absorbent lining and an outsole made of 100% EVA made it slip-resistant.

Today we're in the 4th generation of the products, and this is now a category in the market.

INSOLE DESIGNED TO  
TO WALK WITH YOUR SKATES

## PREMIUM WALKABLE SKATE GUARDS - ANTI-SKID

- 3" wide nylon webbing on the bottom of the insole
- Outsole design to walk & reduce slipping
- Water absorbing lining
